

# Year 10 Curriculum Evening

Wednesday 9th October 2024

Thank you...

*'Parental involvement in a pupil's education is a win-win-win. Teachers benefit from the additional support, both academically and behaviourally; parents feel more involved in their child's academic life; and students can take advantage of an enhanced support system, which increases their chances of academic success.'*

# VESPA Academy 2024-25 - Rationale

The rationale behind the project is to increase Year 10 students' awareness of how they learn and build lifelong skills that they can transfer both to their GCSE studies and into their working life. The bespoke programme will foster a sense of **ownership** and **independent** learning.

The impact will be seen in all aspects of school life – increasing **self-esteem** and give the students drive to strive for their vision while learning to overcome barriers.

On the evening information was shared about the VESPA project in detail. Please explore the programme by clicking on this link - [VESPA ACADEMY](http://www.vespa.academy) www.vespa.academy. The students will be introduced to the system after half term and further information will be sent home via email.

# THE VESPA MODEL

The VESPA model is based around 5 key components to student success, providing a framework for students to develop study skills.

**VISION**

**EFFORT**

**SYSTEMS**

**PRACTICE**

**ATTITUDE**
