

The Pupil Premium Grant in Science 2015-16

A lot of pupil premium students purchased the revision guides and workbooks themselves, while others did purchase through pupil premium funding (Some of this year's funding was for current Y10 and the impact will be assessed next year)

Pupils have said they found them helpful – some were lent copies and then chose to order the books as they felt they would be useful – also they wanted copies of what most of the other students had, so they did not feel left out.

There has been significant improvement in assessment grades in comparison to both FFT and class averages (showing a narrowing of the gap)
